

Team Lead, Statistical Programming

Are you an experienced statistical programmer and do you thrive in a highly professional, dynamic and inspiring environment?

Would you like the chance to lead and further develop the statistical programming department with a smooth decision-making process and valued employee influence? Then you may be our new Manager of Statistical Programmer at Larix.

What you will do

At Larix, you will be heading the Statistical Programmer group – your main tasks will be to manage and further develop the group of statistical programmers as well as be part of the daily work. You will be responsible for the coordination and planning of the resource allocation and ensure timely and high-quality deliverables from the team. You will also be involved in client contacts and contracts and will drive the development of tools and other technical solutions in the department.

Who you are

You are an experienced statistical programmer, preferably with management experience – we will get to know you as a proactive and competent employee who approaches projects with a team player's spirit. Moreover:

- >10 years as a statistical programmer
- You have expert knowledge of SAS, while solid experience with other languages such as R, VBA and C++ is an advantage.
- Prior experience with CDISC, reporting trials, submissions and variation applications.
- You have a strong professional network within the Danish/Swedish pharma/biotech/medtech environment.
- Leadership and/or mentoring experience in a clinical development environment
- Ability to plan and organize tasks and prioritize when needed.
- You have good communication skills. You speak one of the Scandinavian languages (DK, SE, NO) and understand the other two. You speak and write English effortlessly.

Are you interested?

We would love to hear from you. To apply for this position, please forward your application and CV to job@larixcro.com or by applying here on **LinkedIn** using EasyApply. Applications will be handled by our Business Manager in the order they arrive and no later than 15-Jan-2021.

For more information, please contact Tu Duyen Le Thi, Head of Statistics and Statistical Programming, Larix A/S at +45 8188 4224.

We look forward to welcoming you on board - we offer a competitive salary package including pension scheme, life and medical cover, ongoing education, and the opportunity to work at home from time to time.

Who is Larix?

Larix A/S is a Nordic Contract Research Organisation – we offer full-service solutions within the pharmaceutical and medical device areas. We are working either in-house at Larix following the internal SOPs or as outsourced consultants following the client SOPs. We are working closely together with our sister company, Aixial, which is a larger French CRO. This gives us all the advantages of being a small agile and flexible company combined with support from a larger company when it comes to e.g. systems and resources.

At Larix, we keep a friendly atmosphere – we believe having fun while working is important. We are a relatively small company with approximately 70 employees, and we have all the benefits of being able to collaborate across functions, follow clinical trial processes from start to finish, and learn from each other.
