

Team Lead, Statistician

Are you an experienced statistician and do you thrive in a highly professional, dynamic and inspiring environment?

Would you like the chance to lead and further develop the statistician department with a smooth decision-making process and valued employee influence? Then you may be our new Team Lead in our Statistician department at Larix.

What you will do

At Larix, you will be leading the Statistician group – your main tasks will be half time to manage and further develop the group of statisticians and the other half time being a part of project related work. You will be responsible for the coordination and planning of the resource allocation and ensure timely and high-quality deliverables from the team. You will also be involved in client contacts and contracts and will drive the development of tools and other technical solutions in the department. For a period of time, you will be managing the whole statistical and programming department.

Who you are

You are an experienced statistician, preferably with management experience – we will get to know you as a proactive and competent employee who approaches projects with a team player's spirit. Moreover:

- You have a MSc or PhD in Statistics or in natural science with a substantial statistical component
- You have expert knowledge of statistical methodologies related to trial design and reporting of these including the latest developments within the field
- You have a solid experience within programming, CDISC, modelling, and simulations in a statistical software, preferably SAS
- You have a strong professional network within the Danish/Swedish pharma/biotech/medtech environment
- Leadership and/or mentoring experience in a clinical development environment
- Ability to plan and organize tasks and prioritize when needed
- You have good communication skills. You speak one of the Scandinavian languages (preferably, not exclusively). You speak and write English effortlessly

Are you interested?

We would love to hear from you. To apply for this position, please forward your application and CV to job@larixcro.com. Applications will be handled by our Talent Acquisition Partner in the order they arrive.

We look forward to welcoming you on board - we offer a competitive salary package including pension scheme, life and medical cover, ongoing education, and the opportunity to work at home from time to time.

Communication ♦ Proactivity ♦ Quality on time

Who is Larix?

Larix A/S is a Nordic Contract Research Organisation – we offer full-service solutions within the pharmaceutical and medical device areas. We are working either in-house at Larix following the internal SOPs or as outsourced consultants following the client SOPs. We are working closely together with our sister company, Aixial, which is a larger French CRO. This gives us all the advantages of being a small agile and flexible company combined with support from a larger company when it comes to e.g. systems and resources.

At Larix, we keep a friendly atmosphere – we believe having fun while working is important. We are a relatively small company with approximately 70 employees, and we have all the benefits of being able to collaborate across functions, follow clinical trial processes from start to finish, and learn from each other.
